

Project Overview

During our field trip to the **Boreal Smart Farm**, we explored how modern technology, sustainability, and artificial intelligence are changing agriculture and food production.

In this project, you will design and develop a **3-page interactive website** to showcase:

- your field trip experience
- what you learned
- future smart farming technologies
- how AI and technology can improve agriculture

You will use:

- **HTML** → website structure
- **CSS** → website design and appearance

This is a **front-end web development project**.

Required Files

You must create at least the following files:

index.html
learning.html
gallery.html
style.css

Website Requirements

1. Minimum 3 Pages

Your website must contain at least 3 connected pages.

Suggested Pages

Page	Purpose
Home Page (index.html)	Introduce the field trip
Learning Page (learning.html)	Explain what you learned
Gallery Page (gallery.html)	Images, videos, JavaScript interaction

Navigation Menu

Each page must contain a navigation menu.

HTML Requirements

Your website should include:

- headings
 - paragraphs
 - images
 - links
 - lists
 - div containers
 - classes and/or ids
 - navigation links
 - at least one button
-

CSS Feature	Example
text colour	color
background colour	background-color

CSS Feature	Example
font styling	font-size, font-family
Spacing	margin, padding
Borders	border
layout containers	div
class selector	.box
id selector	#title

Website Content Requirements

Home Page

Introduce:

- the Boreal Smart Farm
 - the field trip
 - the purpose of the website
-

Learning Page

Explain at least 3 things you learned about:

- smart farming
 - AI technology
 - sensors
 - sustainability
 - hydroponics
 - vertical farming
 - food production
 - greenhouse systems
-

Gallery / Media Page

Include:

- images
 - captions
 - video section
-

Design Expectations

Your website should be:

- organized
 - creative
 - visually appealing
 - easy to navigate
 - readable
 - school appropriate
-

Submission Requirements

Submit:

All HTML files

style.css

All images/media used

Assessment Categories

Category	Description
Knowledge & Understanding	Understanding of HTML, CSS
Thinking	Organization and problem solving

Category**Description**

Communication

Design and presentation
